DETAILED ACTION

This application is in **condition for allowance except** for the following **formal matters**:

Election/Restrictions

1. Applicant's election without traverse of "Species I", upon which "claims 1-4, 6-7, 9-21, 23-39, and 41-42" are identified, in the reply filed on 20 April 2005 is acknowledged. Claim 25, however, does not read on the elected species as it depends from non-elected species claim 22. Accordingly, claims 5, 8, 22, 25, and 40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to one or more non-elected inventions/species, there being no allowable generic or linking claim.

2. Claims 1, 12 and 29, however, are generic and allowable over the prior art of record. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 5, 8, 22, 25, and 40, directed to species II, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or

nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include one or more reference signs not mentioned in the description. Note, for instance, "136" (shown in FIG. 1, for instance).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) and/or an amendment to the specification in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities:
 - a. In line 3 of claim 14, "respective" should be changed to --said-- for better clarity.
 - b. In line 2 of claim 34, "said conductive coils" should be changed to --said at least one conductive coil-- in order to more clearly refer back to that set forth in line 4 of independent claim 29.

Appropriate correction is required.

Claim Rejections/Considerations - 35 USC § 103

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

6. Claims 1-42 are allowable over the prior art of record. The prior art of record does not teach nor suggest the use of an insulating element having a composition with a negative coefficient of thermal expansion with a thin film structure including a reader element and a writer element with at least one conductive coil.

Conclusion

7. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
